Figure 1. WWO Coin Group – Twenty 8 Real coins – Crest side

13 of these coins have Type 1 certificates with 1966 value estimates noted on the back; 10 by Elva McArdle and 3 by Kip Wagner. 7 of these have Type 2 certificates. The coin denoted * has a notation on the back of its certificate by Elva McArdle as being a “broken 8”.

Figure 2. WWO Coin Group – Twenty 8 Real coins – Cross side

Each coin has been “flipped over” in its same place of Figure 1. Some of these retain the value tags which Dad placed on them. These correspond to the values noted on the back of their respective certificates by Kip or Mrs. Elva McArdle (a K or E respectively, precedes their estimates).

Figure 5. An unusual $\frac{1}{2}$ reale coin, WWO group, enlarged approx. 4x above left. Writing on The holder is by the Museum of Sunken Treasure.

I presume the "M 5085" is their inventory number

Figure 6. PAK Coin Group – eleven 8 Reale and three 4 reale coins - Crest

All 14 of these coins have Type 2 Certificates, signed by Kip Wagner.
The coin denoted by the arrow is an 4 real blank - but struck with 8 real dies
(in Mrs. McArdle's opinion) – an interesting coin.

Again, the coin denoted highlighted by the arrow is the one described in Figure 6.

Figure 8. Type 1 certificate with its coin – typical detail.

The K-E - \$60.00 inset is scanned from the reverse and indicate both Kip Wagner and Elva McArde valued this particular coin at \$60 in 1966.

Each of these measures 8 ½ x 11 inches. The top left certificate image is greatly reduced in size.

Not to scale

Each of these measures 8 ½ x 11 inches. The image is reduced in size.
